

# Study Seeking Parents of Kids With Medical Complexities

## What's the purpose of the study?

Researchers hope to help parents of children with complex medical conditions with home care through an interactive voice technology mobile app.

## Who can take part in this study?

Parents of children who have been diagnosed with a complex medical condition such as (but not limited to):

- Cystic fibrosis
- Encephalopathy
- Chronic pulmonary disease
- Cerebral palsy
- Down syndrome
- Diabetes

Participants must be iPhone users (iPhone 8 or above operating on iOS 13 or above).

## Will we be paid for the study?

Yes, families can earn up to \$30 for participating.
